

Need an extra pair of hands for your software documentation?

Hire Seneca's Technical Communication Graduate students!

Our graduate students are trained to complete hands-on projects that require practical application of authoring and design tools. They are trained to work individually and as part of a team to ensure that your documentation uncovers, polishes, and delivers your ideas the way you intend them to. By hiring our graduate students, your team will benefit from having a job-ready student, with experience working in a technology-driven environment.

Benefits of hiring a Seneca Technical Communication student

- Our students possess practical experience in documenting complex softwares—producing multiple output format—from online help to print documents.
- Ability to streamline complex information into simplified end user documents.
- Tax Credit for each paid work term. A cost saving measure that will allow your company to evaluate potential employees.
- Graduate students bring new ideas, fresh perspective, and enthusiasm to the workplace.
